

WELCOME TO KEMIJOKI IN TERVOLA!

BOATING

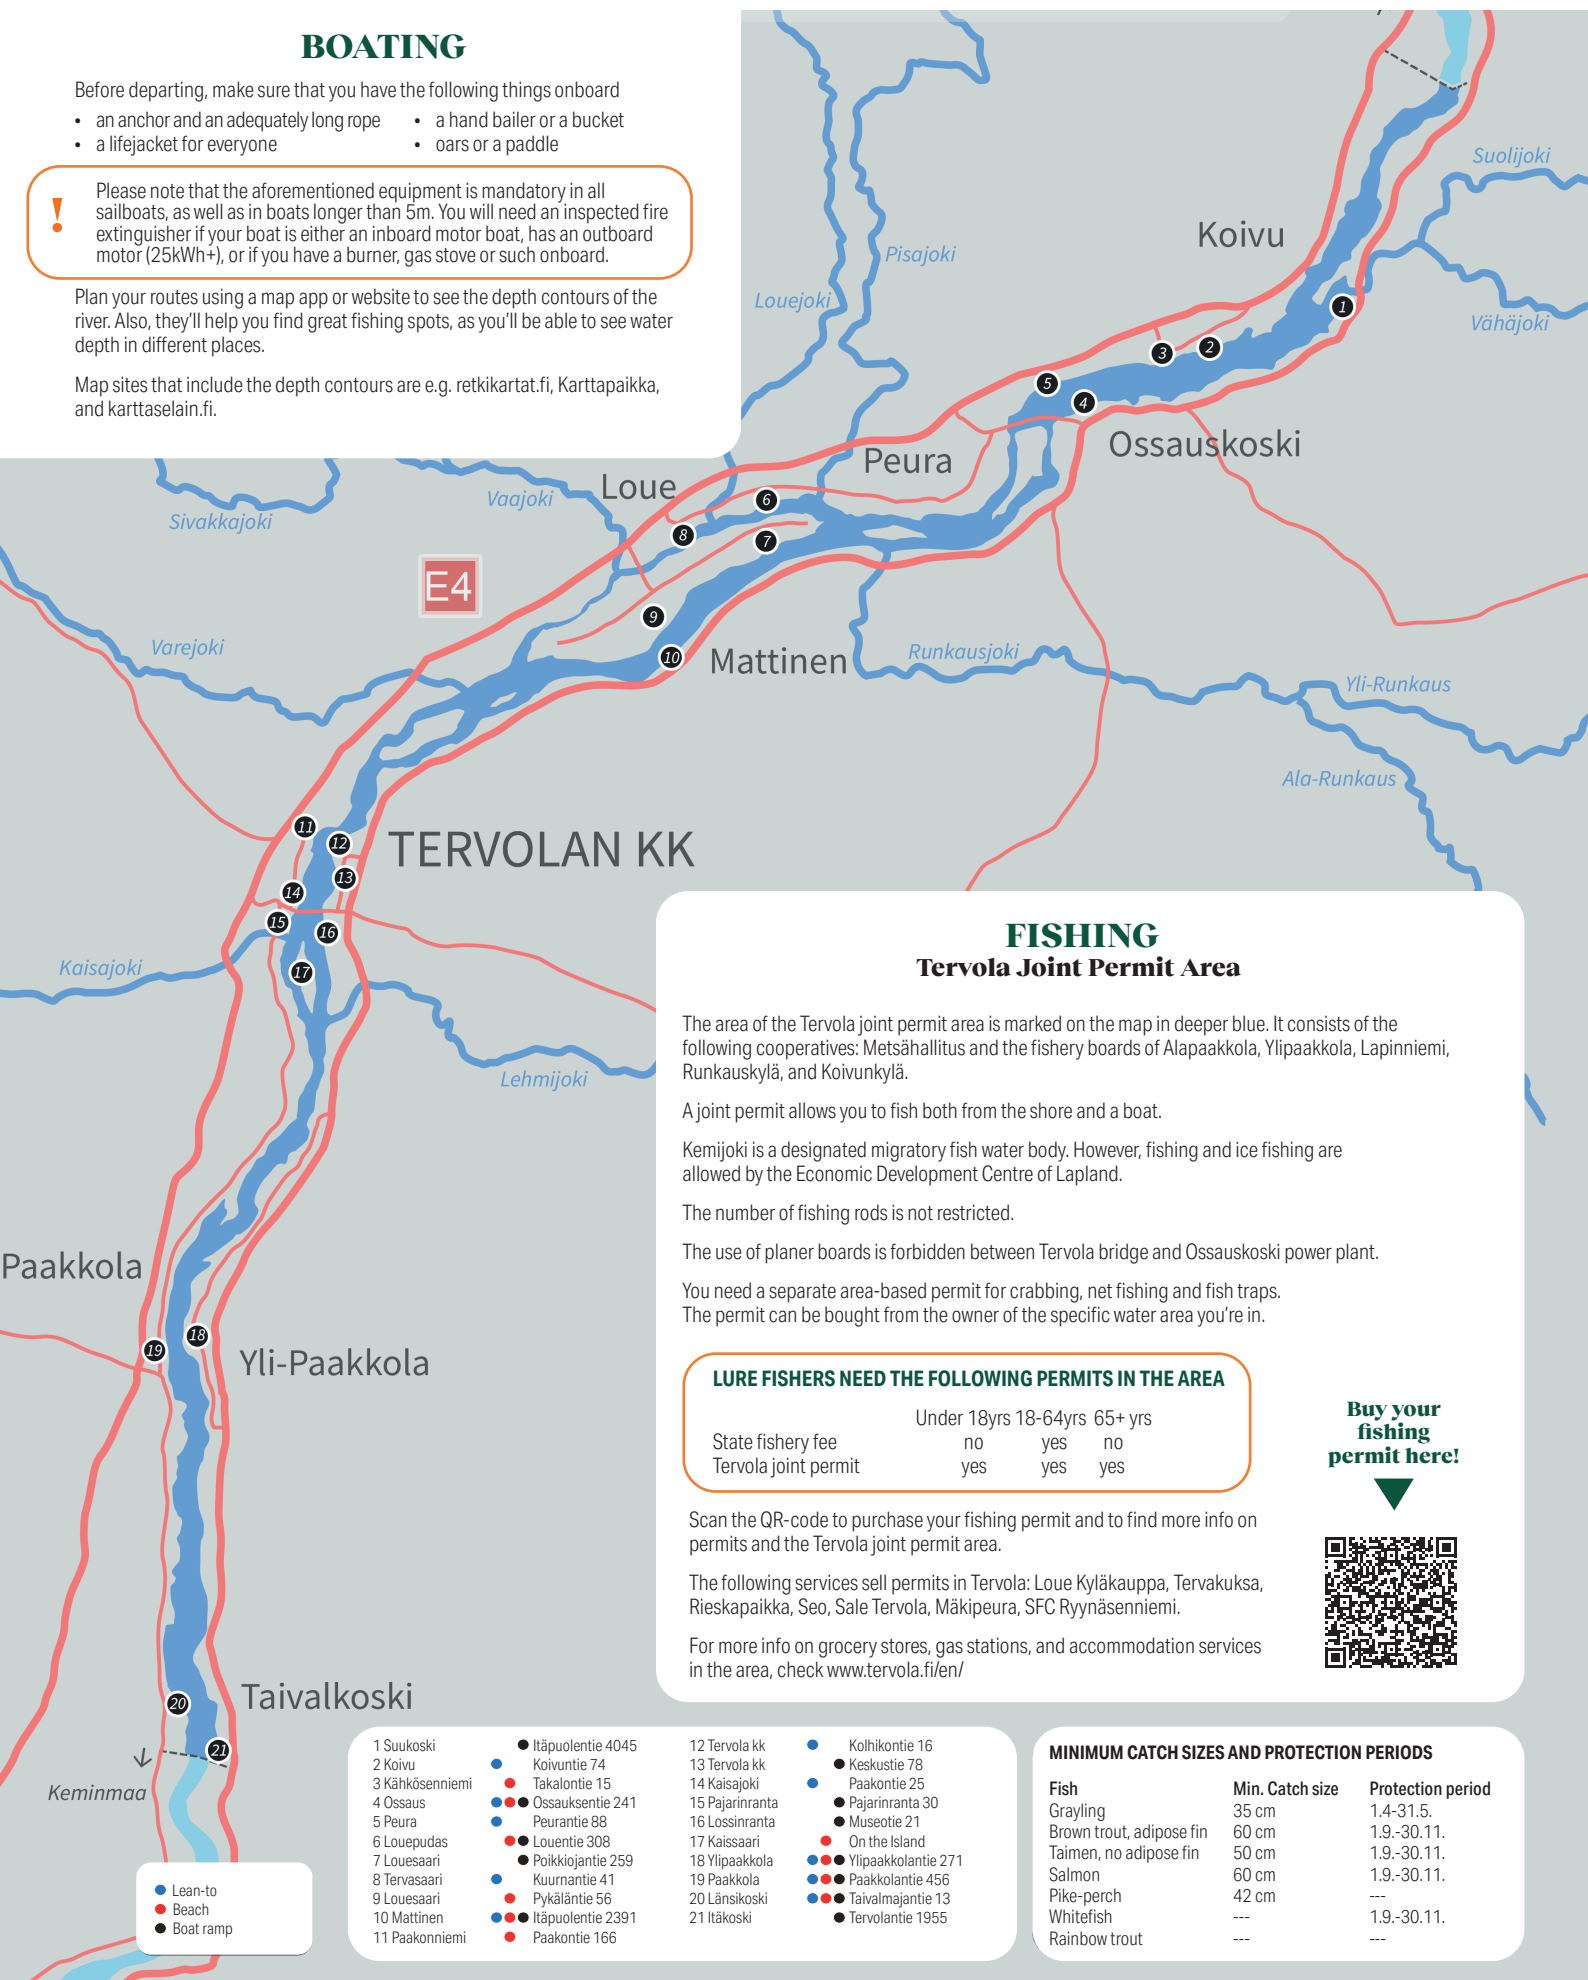

Before departing, make sure that you have the following things onboard

- an anchor and an adequately long rope
- a lifejacket for everyone
- a hand bailer or a bucket
- oars or a paddle

Please note that the aforementioned equipment is mandatory in all sailboats, as well as in boats longer than 5m. You will need an inspected fire extinguisher if your boat is either an inboard motor boat, has an outboard motor (25kW+), or if you have a burner, gas stove or such onboard.

Plan your routes using a map app or website to see the depth contours of the river. Also, they'll help you find great fishing spots, as you'll be able to see water depth in different places.

Map sites that include the depth contours are e.g. retkikartat.fi, Karttapaikka, and karttaselain.fi.

FISHING

Tervola Joint Permit Area

The area of the Tervola joint permit area is marked on the map in deeper blue. It consists of the following cooperatives: Metsähallitus and the fishery boards of Alapaakkola, Ylipaakkola, Lapinniemi, Runkauskylä, and Koivunkylä.

A joint permit allows you to fish both from the shore and a boat.

Kemijoki is a designated migratory fish water body. However, fishing and ice fishing are allowed by the Economic Development Centre of Lapland.

The number of fishing rods is not restricted.

The use of planer boards is forbidden between Tervola bridge and Ossauskoski power plant.

You need a separate area-based permit for crabbing, net fishing and fish traps. The permit can be bought from the owner of the specific water area you're in.

LURE FISHERS NEED THE FOLLOWING PERMITS IN THE AREA

	Under 18yrs	18-64yrs	65+ yrs
State fishery fee	no	yes	no
